DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO'934 and what is known in the art substantially for the reasons of record.

See the previous office action for details.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1794

Specifically, the statement that an amylose content is “of at least 70 %” does not comply with 112, second paragraph requirements. Does it mean by weight ?

The amendments and remarks filled by applicants in their last response have been fully considered. Applicants have mainly argued that the prior art does not teach the claimed invention because it fails to teach the alleged unexpected results regarding greaseproofness. In response, the examiner submits that the results disclosed in the specification are not convincing. The prior art teaches that it would have been obvious to construct the claimed laminate and that unexpectedly improve flexibility of the laminate is obtained. The prior art does not have to have the same improved property disclosed. It is not clear how the results in the specification would be unexpected as compared to the closest prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to leszek b. kiliman whose telephone number is 571-272-1509. The examiner can normally be reached on M-T, 6.30-5.00.
